Discover more about NetOptiks:

Fast, reliable and secure fibre optic connectivity

A Brantford company serving Brantford customers

NetOptiks

NetOptiks: An advanced telecommunications service

NetOptiks, the fibre division of Brantford Energy Corporation, is dedicated to providing the most up-to-date, affordable, high-speed, high bandwidth telecommunications services to local businesses, institutions and community organizations.

NetOptik's services are the first of their kind offered in the Brantford area. We provide creative solutions to achieve the fast, high volume telecommunications capabilities that businesses require.

We have developed a new high-speed, digital, community-wide Metropolitan Area Network (MAN) that is, by far, the fastest and most economically priced system available in Brantford.

The NetOptiks Advantage

NetOptiks provides global connectivity using a fibre network (fibre-to-desk) and Internet Protocol on which customers can run any IP applications.

Our clients benefit from state-of-the-art technology for a full suite of voice, video and data services with one point of contact, excellent service and competitive pricing. It allows them to do what they do best, run their business.

The root of NetOptiks service technology is the pure fibre optics used to provide clients with one of the most advanced data connections in the area. We offer a pure optical solution, not a hybrid.

> High speed, high volume

Coupled with laser technology and state-of-the-art electronics, fibre optic cable can transmit and receive vast amounts of data far in excess of traditional copper cable. Speeds range from 512 kbps to Optical Carrier speeds.

> Reliable and cost-effective

Fibre optic technology is safe, secure and cost-effective. It has the highest level of reliability and redundancy for transmitting audio, video and data information. The broad bandwidth provided by fibre optics makes it the preferred method of transmitting information in today's digital world.

> Scalable and flexible

NetOptiks is a one-source tap for voice, video and data transmission that can grow with your organization. It allows you to extend your Local Area Network to remote sites in the city, throughout the province, across Canada and around the world.

> Security

NetOptiks offers secure and reliable virtual private networks (VPN) for community-wide networking requirements. This enables businesses that need to communicate from several office locations to transfer their confidential data and communications over a guaranteed, 24-hour secure fibre optic connection.

NetOptiks Applications

Many applications may be added to your NetOptiks connection:

- > Wholesale and Retail Business Internet Services
- > Point to Point Transparent LAN Services (TLS)
- > Point to Multi-point Connectivity
- > Wide Area Network Design
- > Videoconferencing, Voice Over IP
- > Corporate domain, web, e-mail and e-commerce hosting services
- > Offsite data storage services

NetOptiks has also formed strategic partnerships with technological leaders to take advantage of their extensive knowledge and expertise.

The NetOptiks Commitment

NetOptiks is dedicated to providing the best customer service possible. We are continually looking to provide additional services that will benefit you.

We have been in the utility business for nearly a century. We understand the need to serve our customers 24 hours a day, 7 days a week. We live and work in your community. Our stable ownership means you can be confident that we're here for you – today and tomorrow.
